

# GROUT CHART

| 1 Bucket = 50 lbs       |  |
|-------------------------|--|
| Type of Precast         | Approx. lineal feet based on 3/8" wide grout joint |
| Wall Caps W/ 10" BASE   | 100 LIN FT   |
| Pool Coping 12" BASE    | 100 LIN FT   |
| Pool Coping 18" BASE    | 65 LIN FT  |
| Balusters W/ BASE & CAP | 20 LIN FT  |
| Columns 8 FT High       | 3 to 4 Columns                                     |

**INSTRUCTIONS: JUST ADD WATER DO NOT ADD EXCESSIVE WATER**

## Pacific Stone Grout Application

1. Grout joints should be clean cool and moist (mornings are best grouting times)
2. Grout needs to be mixed with acrylic add mix (see acrylic recommendations) (to a consistency similar to tooth paste) 4" slump recommended.
3. Too much liquid (soupy texture) will cause grout to crack and fail quickly.
4. Apply with grout bag. Apply to bottom of coping and 3/8" above top of coping, wait 3 to 10 minutes (depending on weather) then with small margin trowel push excess down into grout joint. Wait 3 to 5 minutes and then sponge to make flush.
